

AUTOFIREX® FIRE DETECTION TUBE R0406 7000100

TECHNICAL DATA SHEET TDS-DOC-AFX0011 Rev July2022

AutoFireX® Fire Detection Tube is a Linear Pneumatic Heat Detection tube specifically manufactured and designed for the use in fire suppression systems that responds to combination of heat and radiant energy that generally accompanies a fire. The pressurised Fire Detection tube when exposed to fire/radiating heat from fire, is designed to rupture due to flame impingement, at specific temperatures at any point throughout its length, thereby releasing the pressure and initiate the release of the suppressant from connected valve and operate any other pressure operated signalling device interfaced with the system. The AutoFireX® Detection Tube is used as a nonelectrical detection device.

Key Features

- ✓ Special Formulated material designed to function in Harsh and reactive environments.
- ✓ Formulation designed to prevent surface damage when exposed to or installed on Galvanised metal/equipment's.
- ✓ Special Formulation prevents gradual permeation of pressurising agent over period of time, adding to its 100% reliability.
- ✓ Non-Destructive Tested to withstand pressure max up to 140 Bar.
- ✓ UV Protected (Blue)
- ✓ Low moisture and water absorption ratios.
- ✓ Chemically resistive to most common chemicals
- ✓ Compatible with all Inert, Low pressure and High-Pressure Agents
- ✓ Utilised and installed as combination linear heat detector and unit activation device to cause actuation of Fire Suppression Systems.

Typical Material Specification

Composition: Special Formulated, inert, nonconductive blend of Modified Polymer Material
Dimensions: Red:6mm x 4mm (OD x ID)
Part Number 7000100
Rating: 138°C @15 Bar
Activation temperature: Approx. (110°C to 138°C) *
Standard Requirements: BS ISO: 7628: 2010, BS5409 CE, UL

*NOTE: Detection time and temperature will be affected by factors such as internal pressure, flame intensity and rate of rise temperature changes

Physical Properties 4 x 6mm Red FDT	
Density	1.025Kg/m ³
Moisture absorption 23°C - 50%RH	0.70%
Water absorption, immersion at 23°C	1.50%

Thermal Properties	
Thermal Decomposition	175°C
Heat Deflection Temperature	45°C

Electrical Properties	
Dielectric Strength (DIN53481)	Dry 35kV/mm
Volume resistivity	10 ¹¹ Ohm-m
Surface resistivity	10 ¹² Ohm

Verification Test	Min	Typical	Max
Operating Pressure Red	7 Bar	13-20 Bar	Bursts 140 Bar
Operating Temperature Red	-30°C	+25°C	+75°C
Storage Temp.	+5°C	+25°C	+35°C
Temp. Cycle Limits	-	2°C/min	10°C/min
Operating Humidity	0 Rh	40-60 Rh	100 Rh condensing
Detection Response Time Red	4-5 secs 450°C @10- 12Bar	6-8 secs 138°C @13-15 Bar	10 secs 300°C @12Bar
Bending Radius	42mm	30mm	24mm
Wall Thickness	0.9mm	0.9mm	1.09mm
Tolerance	+/- 0.1mm	+/- 0.1mm	-

APPROVALS & LISTINGS:

UL Recognised Component

UL Recognised Component Marked Under UL 521 Certification of Heat-Automatic Fire Detectors Component (Tubing)

Quality Management System: ISO 9001:2015 Certified

Charpy Notched Impacy Strength -30°C	ISO179/1 eA	KJ/m ²	Dry	NA
			Cond	6

The FDT has been internally Hydrostatic tested for and following values have been established:

Hydrostatic Burst Pressure:

Minimum Burst Pressure: 75 Bar

Typical Burst Pressure: up to 140 Bar
